

JOURNAL TRACK · PAPER-FACING SLIM

NeuroTrace-DAG

Status: Confirmatory H-rev results pending locked **--touch-test** (prereg-v1 + OSF). Ranking / calibration below are exploratory or diagnostic.

Primary claim (registered): native↔cluster GRU–Markov sign flip; m_planned=6 Bonferroni; GRU seeds 20261101/02/03; two-method intersection; TOUCH_TEST_OVERRIDE gate for re-touch. Full technical inventory: **--mode=full** → NeuroTrace-DAG_Data_Flow_Report.pdf. LaTeX: paper/main.tex + paper_assets/tables/. After touch: regenerate with scripts/build_paper_assets.py from JSON only — never hand-edit claim cells.

1. Confirmatory H-rev

Dataset	Unit	Verdict	Bonferroni CI	Eligible
junyi_timed	native	pending_confirmatory	—	—
junyi_timed	cluster	pending_confirmatory	—	—
assistments	native	pending_confirmatory	—	—
assistments	cluster	pending_confirmatory	—	—
xes3g5m	native	pending_confirmatory	—	—
xes3g5m	cluster	pending_confirmatory	—	—

Source: freeze_partition_replication.json → primary_claims (touch_test=False). Pre-tag dual-map validation numbers are disclosure-only.

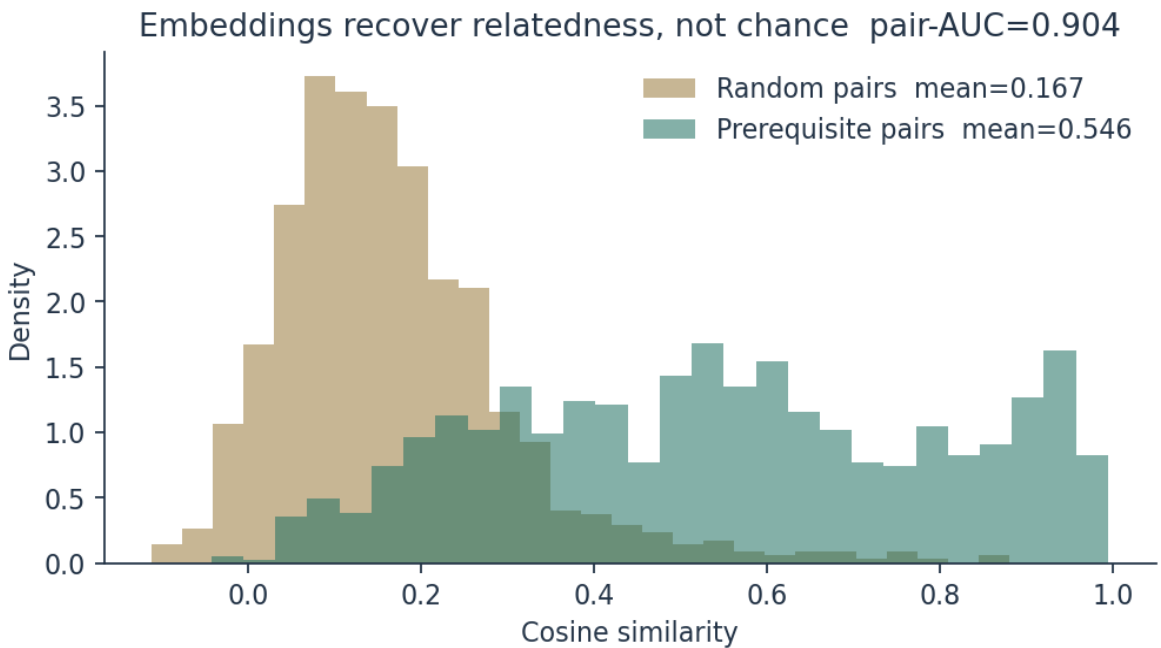

2. Scope

Track	Contents
Confirmatory	Primary H-rev cells + dataset/project sign-flip rules
Exploratory	RAGR ranking, calibration, seed-0 rank-reversal, memory, DAG
Disclosure-only	Pre-tag dual_cluster_gru_markov.json validation CIs

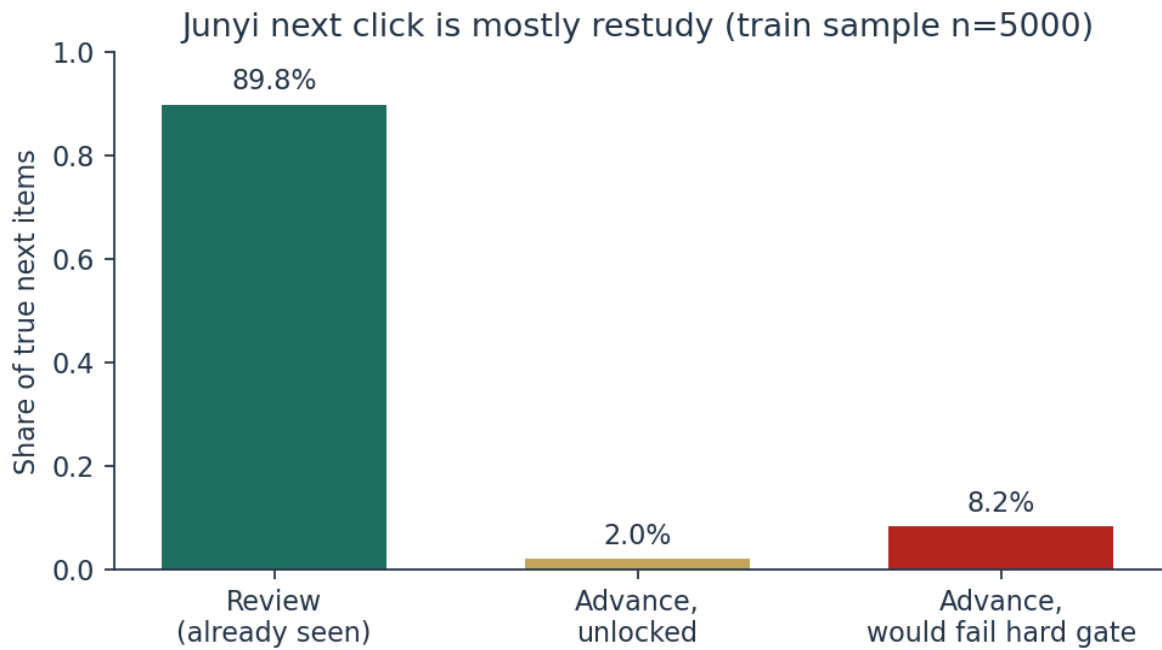

Exploratory canonical capped Junyi RAGR R@5 = 0.891 [0.880, 0.902] (review_ranking.json; not confirmatory).
